Solid Security Basic

Regular automated scans, brute force detection, 2FA, daily security digest email.

WPvivid Backup

Provides a one-click full-site backup, WordPress site migration, is highly configurable, and an easy restore system

WPS Hide Login

This is a really simple way to change the URL for WP Admin, cutting off most brute-force attempts before they begin.

WP 2FA

If none of your other plugins offer 2FA, install WP 2FA and add this extra layer of protection to your site.

Password Policy Manager

Stops users overriding the WordPress strong password setting.

Disable XML-RPC

Disables XML-RPC and RSD, prevents trackback and pingback spam, and is the easiest way to harden .htaccess permissions.

Broken Link Checker

Detects broken links on your site and notifies you by email.

Security Monitoring Service

Rather than do it yourself, have us do it for you.
